SUMMARY

I'm a Fullstack Developer passionate about building seamless web applications. I enjoy the synergy between backend and frontend components and how they interact with each other. My love for continuous learning keeps me at the forefront of industry trends. Each project is an opportunity to exceed expectations, combining my knowledge and genuine love for crafting exceptional digital experiences.

SKILLS

Frontend: Typescript, React, Tailwind CSS, Redux.js

Backend: Nodejs, Expressjs, Postgresql, Mongodb, Sequelize

Other Skills: Git, GitHub, C++, OOP

PROJECTS

What To Game

<https://what-to-game.vercel.app/> • December 2023 - January 2024

- A dynamic website designed to help users discover and choose games efficiently. Leveraging TypeScript for type safety and React for a responsive user interface, this project is a testament to my proficiency in modern web development.
- Users can easily search for games, sort and filter results based on the platform of their choice
- Each game listing provides detailed information, including a comprehensive game description, platform compatibility, user ratings, and games from the same series search
- Built using TypeScript, React, Tailwind CSS and shaden/ui
- GitHub: <https://github.com/SeifOwleN/WhatToGame>
- Website: <https://what-to-game.vercel.app/>

Blog Website

<https://github.com/SeifOwleN/blog> • October 2023 - November 2024

- A Modern Full Stack Blog (Social Media) Web Application
- Users can communicate by posting, liking, and commenting with each other.
- Integrated token user authentication mechanisms to protect user data using jwt, emphasizing the importance of data security and privacy.
- Built Using React, TailwindCSS and DaisyUI in Frontend, Express Js in Backend with MongoDB as the database
- GitHub: <https://github.com/SeifOwleN/Blog>
- Website: <https://blogsitexdd.onrender.com/>

Database Management Website

<https://github.com/SeifOwleN/DBMS> • December 2023 - January 2024

- A powerful and intuitive web platform to interact with their databases.
- Users can seamlessly manage their databases, add single and bulk entries (json and csv), view tables' schema. The platform prioritizes user experience, offering a light responsive design for efficient navigation and utilization.
- Built with React, TailwindCSS, and DaisyUI as for Frontend, Express Js and Sequelize in Backend with PostgreSQL as the database
- GitHub: <https://github.com/SeifOwleN/DBMS>
- Backend: <https://github.com/MohammedEAbdelAziz/TheWebsite>

EDUCATION

Bachelor's degree in Computer and Artificial Intelligence

Cairo University • Giza • 2026 • 3.52

CERTIFICATIONS

Full Stack Open's FullStack Course

University of Helsinki • 2023

- Completed an intensive Fullstack Development certification program, demonstrating proficiency in both frontend and backend technologies.
- Acquired hands-on experience with modern frameworks such as React and Express.js, showcasing the ability to design, develop, and deploy dynamic web applications.

Full Stack Open's Relational Databases

University of Helsinki • 2024
